

G E O R G I A
CENTER FOR MUNICIPAL SOLUTIONS

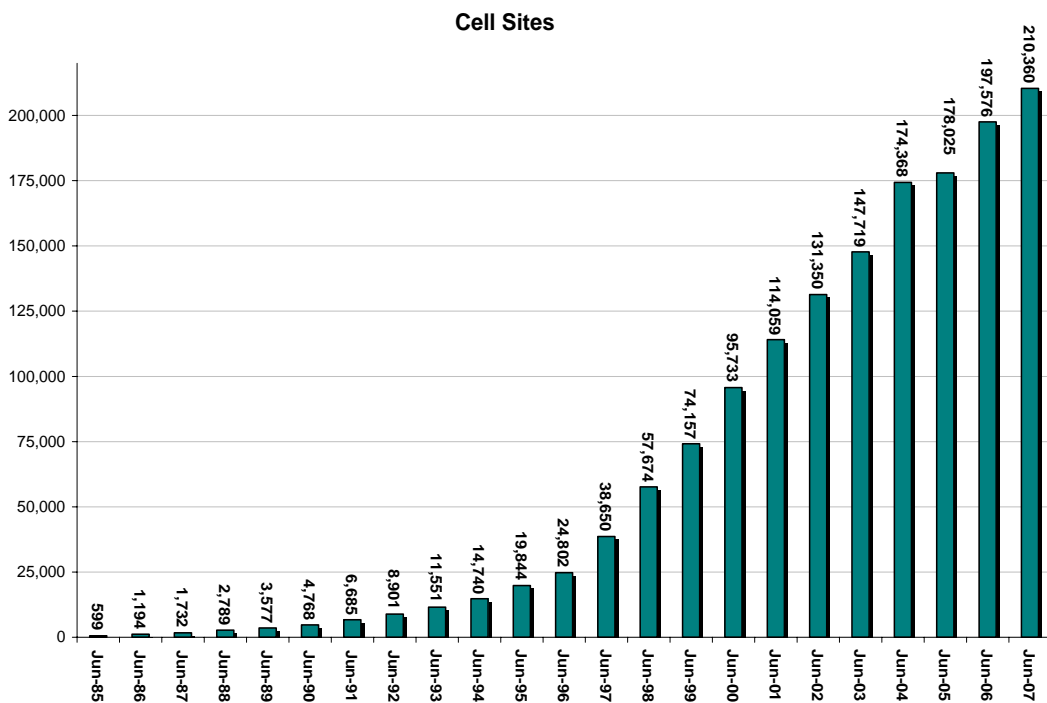

municipal consulting services

How are you handling wireless growth in your municipality?

With the growth in demand for wireless services - voice, text messaging, data - there will be a huge surge in the need for additional wireless sites.

Cell Sites in Service are Up 6.5 Percent Year-over-Year

How would you like to regulate communications towers and wireless facilities at NO COST to the community?

Ask yourself these questions to see if you should work with GCMS...

*Is this something we have a **burning desire** to do ourselves?*

Is protecting the nature and character of the community an issue we should address, or are we willing to let it change and develop on an ad-hoc random basis?

Do we have the needed expertise in-house to assure that we are making truly informed decisions, knowing all the options for any situation and that are necessary to create 'win-win-win' situations?

Do we have the time in-house that is necessary to deal with this issue the way it should be?

If the answers to these questions are **NO**, you should be working with the Georgia Center for Municipal Solutions.

The GCMS Value Proposition

The Municipality

- Organized process for managing wireless growth
- No cost to community to utilize GCMS services
- Potential source of municipal revenue

The Community

- More efficient process means faster time to better wireless service
- Controls over aesthetic impact of new towers
- No taxpayer dollars spent to manage wireless tower growth

The Carriers

- No question about the process - they have seen this model before
- More efficient process means faster time to revenue generation from new sites
- Promotes better community relations

GCMS is an affiliate of the Center for Municipal Solutions, headquarter in Wake Forest, North Carolina. Over the past 10 years, CMS has pioneered and refined the process and methodology utilized by GCMS. Every GCMS client has access to the network of CMS resources with the most up to date information such as going tower lease rates, technology trends and legislative trends.
